SPECIAL NOTICES

ENGLISH VESPER SERVICE: Dr. Merrill, who will preach at this service is Pastor of the Brick Presbyterian Church of New York.

THE UNIVERSITY CONFERENCE ON TEACHING, at its session Tuesday evening, will consider the topic: "The advantages and disadvantages of the Comprehensive Examination as the goal and the test of the process of Higher Education." Many of the present reforms in higher education involve a new place of fundamental importance for the comprehensive examination. Is this change justified? All members of the University Staff are welcome at the meetings of the Conference.

GUIDEBOOK FOR STUDENTS: The office of the Director of Studies is making preparations for a re-issue of the Guidebook for Students for 1932-1933. This time it is to be brought out in English. All members of the faculty are requested to inform that office of any omissions, inconveniences, or errors that they have discovered in the present issue. Suggestions for improvement are especially welcome.

SCARLET FEVER is an infectious disease, the germs are passed from one person to another by the breath or by things passed from mouth to mouth. After a person has become infected the disease does not show itself until from 2 to 8 days. Then the onset is sudden. Sore throat, red palate, headache, vomiting are commonly present. After 24 hours a red rash begins on face, head and neck gradually passing down the body to the feet and back. The tongue has thick white fur but later becomes red. In severe cases, the throat pain is intense, the fever high from the beginning, and later there may be suppuration of the ears and inflammation of the kidneys causing swalling of face, legs and body. It is important to begin treatment as soon as possible.

PREVENTION.—Inoculation is not now considered advisable by the best authorities. To avoid catching the disease, one must keep away from any scarlet-fever patient. Any one who has to nurse a patient must wear a mask and wash their hands carefully before eating or drinking. They should wear a cotton gown, which should be taken off on leaving the patient's room.
